The Lighthouse in the Llastres Cape

SAN ROQUE VIEWPOINT - LUCES - LLASTRES' LIGHTHOUSE

This trail, suitable for all levels, will take us from the coastal town of Llastres to the impressive lighthouse placed in this area's cape. From there, we will be able to enjoy the marvelous sights of the Colunga cliffs.

Route

From the **San Roque viewpoint**, at the top of Llastres, a trail bordering the San Roque recreation area leads us through a 3 km journey to the town of **Luces**. Going through it and following the signs, we will arrive to the **lighthouse in the Llastres cape**. The lamp inside this cylindrical tower emits equidistant light flashes every 12 seconds with an average reach of 23 miles.

From the lighthouse, facing west, we can observe an excellent view of the cliffs all the way from Rodiles beach to Punta de Tazones, whose lighthouse is visible at first sight. To the East we can see as far as Punta Misiera, right next to the town of Llastres.
