## The Obaya Spring

### GOBIENDES - OBAYA

This short trail, suitable for everyone due to its low difficulty and short length, will allow us to discover a beautiful spot at the foot of the mountain range of El Sueve.

### Recorrido

The path starts at the car park of the church of **Santiago de Gobiendes**, where we can leave our car.

We will then take a road that leads us to the town of Gobiendes, passing just next to the Sierra del Sieve interpretation center.

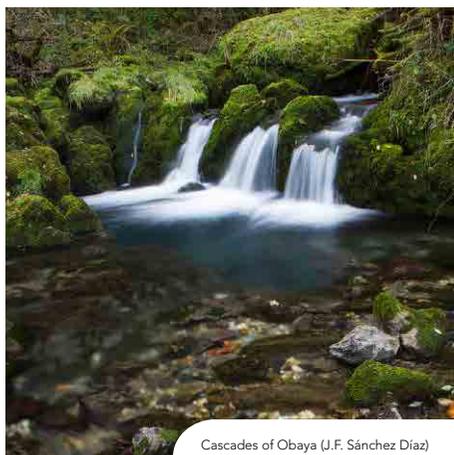

Going through the town, we will reach La Torre neighbourhood, where we will take a path on our left. The trail will lead us down to the **Obaya River**. We can cross the river through a recently built bridge, which replaces the previous one, more precarious, made out of a tree trunk.

In a few meters, next to a water pumping station, the easy trail we were following ends.

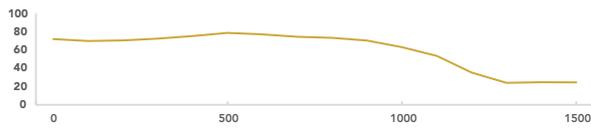

If we don't want to get wet, especially during raining seasons, we can just enjoy from afar the small but beautiful cascades at this spot. If we actually want to keep going forward for a little longer, we can continue walking upstream until we reach the **Obaya pool**. This should be done taking greater precautions, as it is a very slippery surface.
